

SAFETY DATA SHEET

Glycolic Acid Face Wash

Essentials by Catalina, Inc. Version 1.0.0 Revised 2026-09-30 Generated 2026-09-30

1. Identification

Product identifier

Product name: Glycolic Acid Face Wash

Product codes: BASE1545

Recommended use and restrictions

Recommended use: Personal care — face wash (rinse-off facial cleanser)

Restrictions on use: None

Supplier details

Essentials by Catalina, Inc.

12781 Temescal Canyon Road

Telephone: +1 (951) 674-4444

Email: hello@essentialsbycatalina.com

Emergency telephone number

Please contact local poison control: 1-800-222-1222 (USA)

2. Hazard(s) identification

GHS classification

Hazard class	Category	Hazard statement
Skin corrosion/irritation	1	H314: Causes severe skin burns and eye damage.
Serious eye damage/eye irritation	1	H318: Causes serious eye damage.

Signal word

Danger

Pictograms

Precautionary statements

P260: Do not breathe dust, fume, gas, mist, vapours or spray.

P264: Wash thoroughly after handling.

P280: Wear protective gloves, protective clothing, eye protection and face protection.

P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

P303+P361+P353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.

P304+P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.

P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310: Immediately call a POISON CENTER or doctor.

P321: Specific treatment (see first aid instructions on this label).

P363: Wash contaminated clothing before reuse.

P405: Store locked up.

P501: Dispose of contents and container in accordance with local, regional, national and international regulations.

Other hazards

No other hazards not otherwise classified (HNOC) are known.

3. Composition/information on ingredients

Hazardous ingredients

Chemical name	CAS No.	Concentration (% w/w)
Sodium lauryl ether sulfate	68585-34-2	5 - 10
Cocamidopropyl Betaine	61789-40-0	1 - 5
Glycolic Acid	79-14-1	1 - 5

Trade secret claims

No trade secret claims are made for the composition of this product.

4. First-aid measures

General advice

Move the affected person out of the hazard area immediately. Show this safety data sheet to the attending physician.

Rescuers must wear appropriate protective equipment before assisting.

Seek immediate medical attention in all cases of exposure.

Inhalation

Move the person to fresh air immediately and keep them at rest in a position comfortable for breathing.

Inhalation of vapour or mist may cause burns to the respiratory tract.

If breathing is difficult, give oxygen. Immediately call a POISON CENTER or doctor.

Skin contact

Immediately remove all contaminated clothing, shoes, and leather goods.

Rinse the affected skin with plenty of water for at least 30 minutes.

Do not attempt to neutralise. Immediately call a POISON CENTER or doctor.

Eye contact

Immediately rinse with plenty of water for at least 30 minutes, holding the eyelids open.

Remove contact lenses if present and easy to do; continue rinsing.

Immediately call a POISON CENTER or ophthalmologist. Continue rinsing during transport.

Ingestion

Rinse mouth thoroughly with water. Do NOT induce vomiting -- this risks a second corrosive injury to the oesophagus.

Never give anything by mouth to an unconscious person.

Immediately call a POISON CENTER or doctor.

Most important symptoms and effects

Immediate: pain, redness, and severe burns at the point of contact.

Delayed: tissue destruction, scarring, and permanent eye damage.

See Section 11 for toxicological information.

Indication of immediate medical attention

Treat symptomatically. No specific antidote is known.

Do not attempt chemical neutralisation of burns.

Endoscopy may be indicated following ingestion.

5. Fire-fighting measures

Suitable extinguishing media

Use extinguishing media appropriate to the surrounding fire: water spray, dry chemical, carbon dioxide, or alcohol-resistant foam.

Unsuitable media: do not use a direct water jet, which may spread the fire.

Special hazards arising from the substance

Hazardous combustion products may include carbon monoxide, carbon dioxide, and other toxic or irritating fumes.

Advice for firefighters

Wear self-contained breathing apparatus and full protective gear.

Cool closed containers exposed to fire with water spray. Prevent run-off from entering drains or watercourses.

6. Accidental release measures

Personal precautions and protective equipment

Evacuate the area immediately. Ensure adequate ventilation.

Only trained personnel wearing full chemical-resistant protective equipment, including face protection, should respond.

Avoid all contact with skin, eyes, and clothing.

Environmental precautions

Prevent entry into drains, sewers, watercourses, and soil. Notify authorities if the product enters the environment.

Methods and materials for containment and cleaning up

Contain the spill with inert absorbent material such as sand, earth, or vermiculite.

Collect into a labelled, sealable container for disposal in accordance with Section 13.

7. Handling and storage

Precautions for safe handling

Use only in a well-ventilated area. Avoid contact with skin, eyes, and clothing.

Do not eat, drink, or smoke when using this product. Wash thoroughly after handling.

Conditions for safe storage

Store in a cool, dry, well-ventilated place in the original, tightly closed container.

Keep away from incompatible materials listed in Section 10.

8. Exposure controls/personal protection

Occupational exposure limits

Chemical name	CAS No.	Basis	Exposure Limit
Reaction mass of 5-chloro-2-methyl-4-isothiazolin-3-one and 2-methyl-2H-isothiazol-3-one (3:1)	55965-84-9	WEL (Great Britain), long-term, recommended	0.2 mg/m ³
Sodium Hydroxide	1310-73-2	ACGIH TLV	2 mg/m ³
Sodium Hydroxide	1310-73-2	OSHA Table Z-1	2 mg/m ³
Sodium Hydroxide	1310-73-2	NIOSH REL	2 mg/m ³

Appropriate engineering controls

Use local exhaust ventilation at the point of generation. General dilution ventilation alone is not sufficient.

Eyewash stations and safety showers are required within 10 seconds' travel of the workstation.

Handle in a closed system wherever practicable.

Eye/face protection

Wear chemical splash goggles AND a face shield conforming to ANSI Z87.1.

Skin and body protection

Wear chemically resistant gloves with a breakthrough time exceeding the expected task duration.

Wear a chemically resistant apron or full suit and boots.

Inspect all protective equipment before each use and replace any degraded item.

Respiratory protection

Not required under normal conditions of use with adequate ventilation.

9. Physical and chemical properties

Physical and chemical properties

Property	Value
Appearance	Not determined
Odour	Not determined
Odour threshold	Not determined
pH	Not determined
Melting/freezing point	Not determined
Initial boiling point	Not determined
Flash point	Not determined
Evaporation rate	Not determined
Flammability (solid, gas)	Not applicable
Vapour pressure	Not determined
Vapour density	Not determined
Relative density	Not determined
Solubility in water	Not determined
Partition coefficient (n-octanol/water)	Not determined
Auto-ignition temperature	Not determined
Decomposition temperature	Not determined
Viscosity	Not determined

10. Stability and reactivity

Reactivity

No dangerous reaction is known under conditions of normal use.

Chemical stability

Stable under recommended storage and handling conditions.

Possibility of hazardous reactions

Hazardous polymerisation will not occur.

Conditions to avoid

Heat, sparks, open flame, and direct sunlight.

Incompatible materials

Strong oxidising agents, strong acids, and strong bases.

Hazardous decomposition products

Carbon monoxide, carbon dioxide, and other toxic or irritating fumes may form during combustion.

11. Toxicological information

Likely routes of exposure

Inhalation, skin contact, eye contact, and ingestion.

Acute toxicity

Route	Species	Value
No data available	-	-

Symptoms and delayed effects

Causes severe skin burns and eye damage on contact.

Delayed effects may include scarring and permanent corneal damage.

Carcinogenicity

No component of this product is listed as a carcinogen by IARC, NTP, or OSHA.

12. Ecological information

Ecotoxicity

No ecotoxicity data is available for this product.

Persistence and degradability

No data available.

Bioaccumulative potential

No data available.

Mobility in soil

No data available.

13. Disposal considerations

Waste treatment methods

Dispose of contents and container in accordance with local, regional, national, and international regulations.

Do not discharge into drains or the environment. Empty containers may retain product residue.

14. Transport information

US DOT

Field	Value
UN number	Not regulated
Proper shipping name	Not regulated
Transport hazard class	Not regulated
Packing group	Not regulated

Special precautions for user

Transport within the user's premises: always transport in closed containers that are upright and secure.

15. Regulatory information

US federal regulations

This product has been classified in accordance with the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

SARA 311/312 hazard categories

Chemical name	CAS No.	Hazard category
Ethylenediaminetetraacetic Acid, Tetrasodium Salt, Tetrahydrate	64-02-8	Immediate (acute) health hazard
Sodium lauryl ether sulfate	68585-34-2	Immediate (acute) health hazard
Cocamidopropyl Betaine	61789-40-0	Serious eye damage or eye irritation
Sodium Hydroxide	1310-73-2	Immediate (acute) health hazard

SARA 313

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

State regulations

No additional state regulations apply beyond those noted elsewhere in this section.

State Right to Know

New Jersey Right to Know

Chemical name	CAS No.
PEG-150 Pentaerythrityl Tetrastearate	
Water	7732-18-5
Glycerides, mixed decanoyl and octanoyl, reaction products with oxirane	127281-18-9

Pennsylvania Right to Know

Chemical name	CAS No.
PEG-150 Pentaerythrityl Tetrastearate	
Water	7732-18-5
Glycerides, mixed decanoyl and octanoyl, reaction products with oxirane	127281-18-9

California Proposition 65

No components of this product are known to the State of California to cause cancer or reproductive harm.

International inventories

All components are listed on, or exempt from, the US TSCA inventory.

TSCA inventory basis

Material	CAS #	Basis
PEG-150 Pentaerythrityl Tetrastearate (and) PEG-6 Caprylic/Capric Glycerides (and) Water	Not Assigned	Product either contains a chemical substance not listed on the public TSCA Inventory, or its TSCA Inventory status has not been evaluated. For FDA uses only.

16. Other information

Revision history

Version	Date	Description
1.0.0	2026-09-30	Authored document

Disclaimer

The information contained in this safety data sheet (SDS) was obtained from current and reliable sources, was carefully compiled and is believed to be accurate. The information represents the present state of our knowledge and is applicable to the product with regard to appropriate safety precautions.

However, the data is provided without any warrant, expressed or implied, regarding its correctness or accuracy. Since the use, handling, storage and disposal of this product are beyond our control, it is the responsibility of the purchaser both to determine safe conditions for the use of this product and to assume liability of loss, damage, or expense arising out of the product's improper use. Various Federal, State or Provincial agencies may have specific regulations concerning the transportation, handling, storage, use, or disposal of this product, which may not be reflected in this SDS. The purchaser should review these regulations to ensure full compliance.

Prepared in the format of the OSHA Hazard Communication Standard, 29 CFR 1910.1200.
